10. MATHEMATICS THROUGH AN ANTI-OPPRESSION LENS

How can we teach math using an anti-oppressive lens?

Is math culturally neutral? How can we make it culturally responsive?

Whom does perfectionism serve? How is it rooted in colonialism and white supremacy?

We will explore these critical questions in math education followed by a few ideas for teaching math in a way that challenges and includes.

Donna Morgan (she/her) is a settler/immigrant on the unceded territory of the Musqueam, Tsleil-Waututh and Squamish Coast Salish Nations. She is an LGBTQ+, environmental and anti-racist activist. Donna is a retired science and math teacher from Burnaby. Now that I know better I do better.
