Morning Workshops

8. YOUTH FACILITATED DIALOGUE ON HOW TO TEACH CLIMATE JUSTICE EDUCATION IN AN AGE OF CLIMATE ANXIETY

Climate Education Reform BC is a youth-led organization advocating for climate justice-centred education. Our workshop will cover topics such as who we are as CERBC, why climate justice education is important for collective liberation, how to effectively teach students about climate justice, and how to prompt other educators to teach about climate justice. Especially as climate justice education can be framed as too political or overwhelming for students, we will break this down and discuss how to process and work through climate emotions and empower students to take action in their communities.

**Facilitators: TBA**
